

Assignment –2
Introducing Relational Databases.

- 1) Which field of the Customers table is the primary key?
- 2) What is the 4th column of the Customers table?
- 3) What is another word for row? For column?
- 4) Why isn't it possible to see the first five rows of a table?

1. Cnum field is the primary key .

2. Rating is the fourth column of the customers table.

3. Another word for => row : tuple ; for column : Attribute

4. No it isn't possible as data is not stored into the database server sequentially that is , it is scattered.

And there is no internally arranged first or last row concept in the data storage in sql.
